RAFAELLA GODINHO

Senior PHP Full-Stack Engineer | Legacy Modernization · Payments · MySQL

Rio de Janeiro, Brazil (Remote) · rafaellagodinho@outlook.com · linkedin.com/in/rafaellagodinho

PROFESSIONAL SUMMARY

Senior full-stack engineer with 5+ years of experience and deep roots in PHP, focused on improving and modernizing mature, high-traffic systems incrementally rather than rewriting them. Hands-on experience with payment integrations (Stripe, PIX, credit card) and subscription billing, relational database performance (MySQL, PostgreSQL), and full-stack delivery with Tailwind, Vue and React. Comfortable owning work end to end: understanding the existing system, scoping and aligning changes with stakeholders, and shipping improvements safely. Uses AI coding tools daily as part of the development workflow. Fluent English (C1), experienced working remotely with international clients.

TECHNICAL SKILLS

PHP: PHP 8.x, OOP, type safety, SOLID, clean code, Laravel, Symfony, Livewire

Frontend: HTML, Tailwind CSS, Vue.js, React, TypeScript, Next.js

Databases: MySQL (query optimization, indexing), PostgreSQL, SQL Server, Redis, Elasticsearch

Payments: Stripe (subscriptions, recurring payments), PIX, credit card flows, transactional reliability

Quality: Automated testing, TDD, code review, incremental refactoring of legacy code

Infra & CI/CD: Linux servers, Nginx, Docker, Kubernetes, GitHub Actions, GitLab CI/CD, Bitbucket Pipelines, AWS, Azure

AI: AI coding assistants in daily workflow; LLM integration (Azure OpenAI)

Other: Node.js / NestJS, Python / FastAPI, C#, RabbitMQ, REST APIs, multi-tenancy

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER

Jul 2025 – Present

Atento · Remote

- Led the modernization of a legacy PHP monolith used by 30,000+ daily users: audited technical debt, defined coding standards and progressively extracted services, improving scalability without disrupting operations.
- Owned the system lifecycle end to end: scoping requirements with stakeholders, aligning on architecture before implementation, and improving CI/CD, contributing to a 20% reduction in deployment lead time.
- Delivered white-label BI solutions integrating Apache Superset, React, PostgreSQL, SSO and multi-tenant architecture.
- Built an AI-powered data processing platform with Python, FastAPI, Azure OpenAI and queue-based workers on Azure; currently designing LLM-powered conversational agents integrated with CRMs and external APIs.

BACKEND ENGINEER (CONTRACTOR)

Nov 2025 – Present

Westwing · Remote

- Develop and optimize NestJS/Node.js microservices for high-traffic e-commerce checkout, order and inventory flows.
- Designed event-driven processing with AWS SNS/SQS and S3 to scale critical order pipelines.

FULL STACK SOFTWARE ENGINEER

Feb 2025 – Jul 2025

Verum Digital · Remote

- Designed a multi-tenant contract management platform in Laravel with secure company and contract data isolation.
- Developed a Laravel API for Excel file standardization, reducing manual data processing for construction project managers by ~60%.
- Built React interfaces for file uploads, workspace navigation and measurement approval workflows.
- Configured Docker environments and CI/CD pipelines with Bitbucket Pipelines.

FULL STACK SOFTWARE ENGINEER Dec 2023 – Feb 2025

Fadami Software & Innovation · Rio de Janeiro, Brazil

- Architected backend services for a toll payment platform serving 500,000+ users and processing R$20M+ in transactions.
- Integrated PIX and credit card payment flows through REST APIs, ensuring transactional reliability and operational visibility.
- Optimized critical services (Node.js integrated with a C#/.NET backend) to keep p95 response times below 200ms under high load, using caching and asynchronous processing (Redis, RabbitMQ).
- Built real-time revenue and traffic dashboards with React, TypeScript and Recharts.

FULL STACK SOFTWARE ENGINEER (FREELANCE) Sep 2023 – Nov 2023

International clients · Remote

- Delivered Laravel (Livewire, Sanctum) applications for time tracking and financial management with MySQL/PostgreSQL and Tailwind CSS.
- Implemented Stripe subscription and recurring payment flows with backend validations and transactional business rules.
- Deployed to Linux servers with Nginx, Docker and GitHub Actions, reducing deployment time from hours to minutes.

FRONTEND SOFTWARE ENGINEER Oct 2021 – Sep 2023

Elumini IT · Remote

- Contributed to the Oi Fibra sales portal, one of Brazil's largest telecom platforms, with millions of monthly accesses.
- Increased organic traffic by 60% through technical SEO, Core Web Vitals optimization and Next.js server-side rendering.
- Built Node.js caching and data-processing middlewares, reducing average page load time by 40%.

SYSTEMS DEVELOPER Mar 2021 – Oct 2021

UNIFOA · Volta Redonda, Brazil

- Developed PHP and C# backend systems for academic helpdesk and internal resource management platforms.

EDUCATION

Graduate Diploma in Software Engineering — PUC Minas, 2025

Bachelor's Degree in Information Systems — Centro Universitário IBMR, 2024
